

ASSESSMENT

Front End Assessment

Convert the attached design on the link below to HTML and CSS. Feel free to use preferred assets relating to the subject or use assets on the design which can be generated from the link

<https://www.figma.com/file/rgQ6wX3IFJvBMAQU8lpegL/Travel-Website?node-id=0%3A1>

The preferred framework for this task is ReactJs

Please note that it should be optimised for mobile

Backend Assessment

1. Periodically fetch data from this endpoint

<https://jsonplaceholder.typicode.com/photos>

and persist data to memory store every 1 minute, information from memory store should not contain duplicates.

You can also decide to use any cloud database of your choice.

2. Create an endpoint to return data with pagination (limit, orderBy etc) Using node JS without any framework design an AP

Note that you are expected to start with the frontend assessment.
